PROGRAM EVALUATION

Under Title IV, Part A, the program or activity shall undergo a periodic evaluation to assess its progress toward reducing violence and illegal drug use in schools to be served based on performance measures. The evaluation will be completed in accordance with Principle 2(A) of the Principles of Effectiveness defined in SDFSCA.

"The results shall be used to refine, improve, and strengthen the program, and to refine the performance measures, and shall also be made available to the public upon request, with public notice of such availability provided."

The evaluation must contain the following: that the program is being implemented as planned, that it reached the targeted population, and that it is having the anticipated impact.

9. How will you know if the outcome goal has been achieved?

In order to determine whether an increase, decrease, or stabilization has resulted due to the implementation of the program, measurements must be taken before the program is implemented and after the program is completed. Comparing the results of the pre- and post-tests allows the amount of change to be identified.

9a. Methods of Measurement (check as appropriate):

All programs and schools must measure progress in achieving their goals.

PROGRAM EVALUATION

Under Title IV, Part A, the program or activity shall undergo a periodic evaluation to assess its progress toward reducing violence and illegal drug use in schools to be served based on performance measures. The evaluation will be completed in accordance with Principle 2(A) of the Principles of Effectiveness defined in SDFSCA.

"The results shall be used to refine, improve, and strengthen the program, and to refine the performance measures, and shall also be made available to the public upon request, with public notice of such availability provided." The evaluation must contain the following: that the program is being implemented as planned, that it reached the targeted population, and that it is having the anticipated impact.

9. How will you know if the outcome goal has been achieved? In order to determine whether an increase, decrease, or stabilization has resulted due to the implementation of the program, measurements must be taken before the program is implemented and after the program is completed. Comparing the results of the pre- and post-tests allows the amount of change to be identified.

9a. Methods of Measurement (check as appropriate):

All programs and schools must measure progress in achieving their goals. A pre- and post-test is recommended.
